DETAILED ACTION

Applicants' preliminary amendment, which included cancellation of claims 1-8 and addition of new claims 9-15, filed on 2/14/2002, is made of record.

Claims 9-15 are now pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 9, drawn to a process of making compound of general formula 2, classified in class 558, subclass 2 and other classes and subclasses depending upon the preferred embodiments of R^4 , R^5 , R^6 groups.
- II. Claims 10 and 12, drawn to yet another process of making compound of general formula 2, classified in class 558, subclasses various.
- III. Claims 11 and 13-15, drawn to yet another variant process of making compound of general formula 2, classified in class 558, subclasses various.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as various process for making compound of general formula 2. As recited each of the process is distinct and can be used independent of the other process. Search, which relates one process, need necessarily relate other process and each variables of the process need to be searched, which would impose serious search burden. Prior art, which read on one of the process, may not be applicable to all other process. See references cited in the Information Disclosure Statement. Each process can be used independent of the other process.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or Group III and vice versa restriction for examination purposes as indicated is proper.

Due to distinct nature of each invention, the restriction is set forth in writing.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
